Dustless Sand Blasting Machine

Dustless Sand Blaster

Sandblasting machine is a new kind of surface treatment equipment, widely used in metal rust & welding slag removal, building surface cleaning, wood restoration, coating & paint removing, oil containment removal, road marking line cleaning etc.

The BT500 is perfect for everything from small jobs to larger industrial projects. It is the best choice for commercial use by employees. It holds up to 76 kg of water and 90 kg of abrasive, which allows up to ~1½ hours of continuous blast time. The higher capacity means fewer refills for greater productivity. This machine runs perfectly with a 185-375 CFM air compressor.

Type	BT150	BT225	BT500	BT800	BT1500	BT3000
Capacity	1 Cuft	2 Cuft	5 Cuft	8 Cuft	15 Cuft	30 Cuft
Blast time	15 min	30 min	60 min	90 min	2-3 hour	4-6 hour
Hose	50 ft.	50 ft.	50 ft.	50 ft.	100 ft.	100 ft.
Weight	158 lbs	263 lbs	368 lbs	427 lbs	838 lbs	1200 lbs

Mobile Dustless Blaster

Our this blast pots are mainly designed and integrated with the wide range of nozzles, wet blast attachments, internal pipe cleaning devices, dust free blasting heads, abrasive control device.

Working principle of dustless sand blasting machine

Our this blast pots are mainly designed and integrated with the wide range of nozzles, wet blast attachments, internal pipe cleaning devices, dust free blasting heads, abrasive control device.

Type	DB150	DB225	DB500	DB600	DB800	DB1500	DB3000
Capacity	1 Cuft	2 Cuft	5 Cuft	6Cuft	8 Cuft	15 Cuft	30 Cuft
Blast time	15 min	25 min	50 min	60	80 min	150min	300min
Hose	8m	8m	8m		8m	12m	15m

DB Dustless Sand Blasting Machine

Liquid sandblasting high efficiency, less abrasive consumption, can improve the surface finish of the workpiece, improve the surface strength, and fundamentally changed the environmental pollution

DB dustless sand blasting machine working principle

Dustless sand blasting machine is the addition of quantitative water in the sand to make it a sand and water mixture to reduce the impact of the sand on the surface of the part, thereby reducing the amount of metal material removed, so that parts of the surface more smooth.

Dustless sand blasting machine is a machine that uses compressed air as the power to form a high-speed jet beam to spray abrasives on the surface of the workpiece to be processed at high speed, form impact and cutting on the surface of the workpiece, and change the mechanical properties of the outer surface of the workpiece surface .

Main advantages of DB Dustless Sand Blasting Machine

1. Wet sandblasting machine, cleaning efficiency, large volume.
2. Applicable to a variety of materials and grain size of the abrasive
3. Liquid sandblasting high efficiency, less abrasive consumption, can improve the surface finish of the workpiece, improve the surface strength, and fundamentally changed the environmental pollution
4. The surface of the parts is not contaminated and the abrasive will not react chemically with the part material;
5. Simple operation, easy maintenance; less wearing parts, low failure rate.

Type	DB150	DB300	DB600
Dia.of tank	150mm	300mm	600mm
Blast time	15 min	25 min	50 min
Hose	8m	8m	8m
